

8.9 MWP ROSKROW BARTON, UK SOLAR PV

PROJECT SUMMARY

The Roskrow Barton 8.9MW solar park in Cornwall, has been completed as part of the Hazel Capital investment portfolio in UK.

METKA EGN acquired the site and followed up the project from development stage and after the EPC completion has undertaken a two year operation and maintenance contract for the project. EPC works included fixed tilt mounting structure, central inverters, client substation at 33kV and interconnection line to the grid.
