

10 MWP BUFULUBI, UGANDA SOLAR PV

PROJECT SUMMARY

The Bufulubi 10MW PV project in Uganda belongs to Emerging Power Uganda, owned by Tryba Energy.

This complex project includes design and implementation of a grid connected, Single Axis solar tracking PV plant with associated Overhead Line (OHL) infrastructure in order to inject produced power directly into the local Grid.

More specifically, METKA EGN offered turn-key services, including design/ engineering, construction, transport, civil engineering, assembly, commissioning and start-up of a 10.020 MW DC PV solar project in Bufulubi, Uganda. The project will be connected to the existing 33KV grid via a new 7KM overhead line.

Construction started in Q3 2018.
